Work From

Workfrom is a largest platform connecting and spaces for mobile workers to get work done.

We're capturing the world's workable spaces online and connecting a generation of professionals with resources needed to thrive outside an office. Our core mission is to support people fending for themselves in a world where traditional offices have already become redundant.

Cybrid Industries

The most inefficient part of a sales funnel is right at the beginning: new leads want answers to the exact same questions, immediately - yet 90% of all leads drop out early anyways. Businesses spend tons of resources to have humans do what A.I. can do better: repetitive, time-sensitive jobs with a low success ratio. We make A.I. Sales Assistants that answer new leads questions within seconds, at any time via live chat and text.

Xesto

Touch-free computing is exploding, but the software support for developing in this space is lacking. Xesto provides developers innovating in this industry a simple solution to circumvent the difficulties of developing applications that respond to precise gestures (ie: a pinch vs. a grab).
